CAR MODEL

PURPOSE OF THE REQUEST

D0022 ALL PITSTOP POSITION 08022023 : Further to this committee decision, the graphic shows the 50cm distance from the 2.5m line from the pitlane side of the line.

In previous years we have been told that the pit box side of the line is where the 50cm is measured from and also that crew members servicing the car are "over the line, if they are on the line" and that we must treat the line as "a wall". This would help for consistency between tracks were the white line width is different (Bahrain is very wide and Monza quite narrow)

Please could the committee firstly confirm that the line should be treated as "a wall" – no people or equipment should be on or over the line. Then if this is the case, the 50cm should always be measured from the pit box side of the line.
