Derogation to remove tyres on all Hypercars competing in this event.

The Stewards received from Michelin ( 8th May 2026 at 19:18) a request for a derogation to replace for safety reasons the four tyres that were used to set the fastest lap during the Qualifying Hypercar Session by each Hypercar.

The Stewards agree to this request under the following conditions which Michelin will have to comply with:

1. To replace the used tyres with four new tyres of exact same specification in order to ensure safe conditions for the 6 Hours Race event.
2. To guarantee that the replacement of four tyres for each car will be identical in compound and specification to those originally used during the Qualifying session.
3. This replacement will be made one tyre for one tyre in order to have no effect on the allocation defined in Article 6.5.4 of WEC Sporting Regulations.
